Re: V-000282-01-3
Colbert Landfill

Dear Mr. Littler:

I am pleased to approve your request for an amendment to the above referenced cooperative agreement, in which you propose to perform Remedial Investigation and Feasibility Study (RI/FS) tasks at the Colbert Landfill, National Priority List (NPL) site. Also, your request to extend the project and budget period to August 30, 1986 has been approved. The grant is amended accordingly.

Please review the enclosed amendment, particularly the added condition in part III which addresses the "advance match" funding. The amendment increases the total project costs, but the federal share remains the same. If it is satisfactory, please sign, date, and return an original and two copies by certified mail to Grants Administration Section, M/S 321, within three weeks of receipt.

If you wish to discuss this amendment, please contact Neil Thompson, EPA Project Officer, at (206) 442-7177.

Sincerely,

Charles E. Findley
Charles E. Findley, Director
Hazardous Waste Division
